👤 Profile

Hello,

After successfully completing the back-end part of my graduation project, I started learning React and Flutter to improve myself in the front-end field. My goal is to gain proficiency in both areas and become a fully-equipped full-stack developer. With the experiences I've gained throughout this process, I aim to master both front-end and back-end development. Thanks to my passion for technology and my constant drive to learn, I have the skills to add value to projects.

I would love to work with you, further advancing my experience, and contributing to your team.

Best regards...

🧠 Skills

ASP.NET Core • Entity Core Framework • OOP • Design Pattern • SOLID • Python • Django • Databases — MSSQL, SQLite, PostgreSQL, PHPMyAdmin, MySQL • Bootstrap • JQuery

🎓 Education

Bachelor degree

2020 – 06/2024 | Manisa, Turkey

Celal Bayar University

Thesis field: Mobile app development

Cumulative Grade Point Average (GPA): 3,20

📁 Professional Experience

Intern

03/2024 – 06/2024 | Manisa, Turkey

Celal Bayar University

I worked on text mining.

Intern

07/2022 – 09/2022 | İstanbul, Turkey

Agito

I created an e-commerce site and learned about Oracle

Intern

11/2021 – 12/2021 | İzmir, Turkey

Ceyber Age Center and Information Technologies LTD.

I did Black Box Testing for a CRM software and prepared support documents so that users can understand the system.

Certificates

C# Essentials Bootcamp
Techcareer.net
2 Weeks 18 Hours

DevOps Jenkins Workshop
Techcareer.net
1 Week 10 Hours

Unity Beginner to Pro Workshop

Projects

Recipe Suggestion App

2024

This project focuses on solving users' daily food problems. Users can see recommended meals based on the ingredients in the refrigerator and pantry, track the amount of ingredients, create a shopping list, and get special recommendations by adding their personal recipes. The unique features of the project include recommendations that suit users' tastes, creating custom shopping lists, and combining different food cultures.

Programming Languages Used in the Project:

Dart

C#

Technologies and Script Frameworks:

Flutter

MSSQL

Entity Framework Core

ASP.NET  Core

Azure Storage

Architecture Used in the Project:

Onion Architecture and Generic Repository Design Pattern

Languages

English — Intermediate (B1)
